

# GitHub Copilot Usage-Based Billing (UBB) Readiness Checklist

## Understand the Changes

- ☐ Review GitHub's transition from PRUs to AI Credits
- ☐ Understand token-based consumption (Input, Output, Cached Tokens)
- ☐ Identify which Copilot features consume AI Credits
- ☐ Understand model-specific pricing differences

## Assess Current Usage

- ☐ Identify high-usage teams and users
- ☐ Review current Copilot adoption across the organization
- ☐ Analyze usage patterns for Chat, Agents, Code Review, and CLI
- ☐ Identify potential power users

## Configure Governance

- ☐ Define Enterprise-level additional spend budget
- ☐ Create Cost Center/Organization budgets
- ☐ Configure User-level budgets
- ☐ Establish budget alert thresholds

## Monitoring & Reporting

- ☐ Enable usage monitoring dashboards
- ☐ Review usage reports regularly
- ☐ Track heavy consumers and trends
- ☐ Establish monthly governance reviews

## Developer Enablement

- ☐ Educate teams on AI Credits

- ☐ Train users on model selection
- ☐ Share prompt engineering best practices
- ☐ Publish internal Copilot usage guidelines

### **Go-Live Readiness**

- ☐ Validate budget configurations
- ☐ Review governance policies
- ☐ Define escalation process for budget increases
- ☐ Communicate changes to all stakeholders
